Report Name CR Students Profile Photos with Base64 Image Data
Report Type Advanced
Data Source Students
Data Source Filter Matriculated Students
Data Source Type Indexed
Primary Business Object Student

Additional Info

Data Source Description Accesses Student as its primary business object and returns 1 row per student. All related objects are reported as of today.

Comments Anderson University (SC) :: This report is used to display all active matriculated students who have a profile picture including the Base64 image data that can be converted to an image file. This report (RaaS) is often used in conjunction with an application that loops through the output and converts the raw data to image files to store locally.

Warning: The Base64 raw image data is very often extremely large for each profile photo. Therefore, it is strongly recommended to NOT run this report with more than twenty (20) individuals identified through the Student prompt.

Columns

Business Object	Field	Column Heading Override XML Alias	Format	Options
Student	Student ID	Student_ID		
Student	Student	Student		
Photo	Base64 Image Data	attachmentContent		
Photo	Created Moment	Created_Moment		

Group Column Headings

Business Object	Group Column Heading XML Alias
Photo	Photo_group

Sort

Specify how the results should be sorted
