Report Name	CR Employees Profile Photos with Base64 Image Data
Report Type	Advanced
Data Source	All Workers
Data Source Type	Standard
Primary Business Object	Worker

Additional Info

Data Source Description
Accesses the Worker as its primary object and returns one row per worker. Includes all workers even workers to be hired in the future. Does not contain any built-in prompts. This data source can be used to build reports on all workers. Helpful Tips - 1) If the worker is hired in the future, all fields will be returned based on the effective date. 2) If no effective date is specified, the system will use the current date as the effective date. 3) If the effective date is less than the worker's hire date, no effective dated information (such as position information, compensation information and so on) will be returned. 4) If effective dated behavior is desired, use the "All Active and Terminated workers" data source instead.

Comments
Anderson University (SC) :: This report is used to display all active employees who have profile photos including the Base64 image data that can be converted to an image file. This report (RaaS) is often used in conjunction with an application that loops through the output and converts the raw data to image files to store locally.

WARNING: The Base64 raw image data is often extremely large. It is strongly recommended to NOT run this report with more than twenty (20) individuals identified in the Worker prompt.

Columns

Business Object	Field	Column Heading Override XML Alias	Format	Options
Worker	Employee ID	Employee_ID		
Worker	Worker	Worker		
Photo	Base64 Image Data	attachmentContent		
Photo	Created Moment	Created_Moment		
Worker	Active Status	Active_Status		

Group Column Headings

Business Object	Group Column Heading XML Alias
Photo	workerPhotos_group

Sort

Specify how the results should be sorted

Sort and Group

Sort by first accessible column

Field	Sort Direction	Display Headers	Summarize Detail Rows	Display Subtotals	Group Name Override
Employee ID	Alphabetical - Ascending				

Grouping and Totaling Options

Enable Outlining based on Grouping

Include Group Name in Headers and Subtotals

Include "Total" label in Subtotals

Display Grand Totals

Filter

Filter on Instances

Filter conditions for filtering on instances

And/Or	(	Field	Operator	Comparison Type	Comparison Value	)	Indexed
And		Active Status	equal to	Value specified in this filter	Yes		
And		Photo	is not empty				
And		Worker	in the selection list	Prompt the user for the value	Default Prompt		

Condition as Text	Active Status equal to Y And Photo is not empty And Worker in the selection list from user input

Filter on Aggregations
Filter condition for filtering on aggregated values

And/Or	(	Aggregation Function	Field	Operator	Comparison Type	Comparison Value	)

Prompts
Specify the prompt defaults that should be used

Prompt Instructions
Instructions

Runtime Date Prompts
Effective Date   Use date and time at runtime
Entry Date   Use date and time at runtime

Display Prompt Values in Subtitle   Yes

Prompt Defaults

Field	Prompt Qualifier	Label for Prompt	Label For Prompt XML Alias	Default Type	Default Value	Required	Do Not Prompt at Runtime	Do Not Include in Subtitle
Worker	Default Prompt		Worker	No default value
